

**Request for Qualifications Operation and Maintenance of Groundwater Treatment Facility**

The State of New Hampshire Department of Environmental Services, Waste Management Division is seeking qualification and experience statements and expressions of interest for operation and maintenance of a 200 gpm groundwater treatment facility located at the Savage Municipal Water Supply Well Superfund (CERCLA/SARA) Hazardous Waste Site in Milford, New Hampshire. The facility has been in operation since March 1999 and treats contaminated groundwater containing volatile organic compounds by means of physical unit processes. Candidates must demonstrate extensive professional engineering experience in the handling and treatment of liquid and solid hazardous wastes; in maintaining a qualified treatment facility operator, and technical support groups; and in providing professional services for optimization of the unit operations in the existing groundwater treatment plant and overall site remediation. A State agency selection committee will review all submittals, and will request proposals from those candidates judged to be qualified. Candidates should provide lists covering the past five years of: previous pertinent clients; experience in operation of hazardous waste and/or wastewater treatment facilities; and description of any work performed under CERCLA and/or RCRA. Send five (5) copies of all documents by March 2, 2007 to: New Hampshire Department of Environmental Services, Waste Management Division, 29 Hazen Drive, Concord, New Hampshire 03301, Attn: Anthony P. Giunta, P.G., Director.
